Dear Parent/Guardian,

As part of the Year 4 curriculum, the children have been asked to design a child-friendly light. Over the past few weeks, they have been researching ideas and starting to plan their own design.

Next Thursday (22nd October), the pupils will be making their design. We ask that the children bring in any materials that they wish to use in their construction into school. (Please refer to your child's equipment list for further information, which they will bring home today.) **School will provide the electrical circuit.**

In order to ensure that this activity is completed in a COVID-safe way, we ask that these materials are brought into school ASAP or by next Monday (19th October). **Please put all materials in a carrier bag labelled with your child's name on it.** Upon receiving them, we will store them for three days. Likewise, we ask that the children's work is quarantined for three days when it is taken back home.

For health and safety purposes, we recommend that circuits are only switched on when attended.

Thank you for your co-operation,

The Year 4 Teaching Team,
Mr Gowans, Miss Weeder and Mr Coburn.

Head Teacher: Mr E Flood
