

Sustainable now, together, forever!

There are 17 sustainable development goals
Agreed by nations from across the globe
The 2030 agenda sets out a plan
For peace and prosperity across the land

Goal number one ends all forms of poverty
Goal number five opens up gender equality
Goal number three is for medicine and health
And goal eight provides decent work and wealth

Goal number four ensures quality education
Six provides clean water and sufficient sanitation
Nutritious food for all is the second of the goals
Come on everybody we can take control.

Let's work together and make the world better
For you, for me, for our future families
We must protect the planet and all the life that's on it
As global citizens, let's make a promise
Sustainable development x 2
We've got to do our best to change the world.
Sustainable development x 2
It'll benefit me, it'll benefit you
Though I admit we've got a lot to do
Sustainable development
It's time to change the world

A need to combat the impact of climate change
Allow access to clean energy that's within everybody's range
Goal eleven supports city construction
Buying fair trade ensures sustainable production

Steady manufacturing is goal number nine
Justice and peace we need to combine
Goal number ten all are treated the same
Fairness and equality we proclaim

Protecting animals of land and sea
That's another one of our priorities
The final goal is the heart of the plan
To achieve the goals which we know we can.

Repeat chorus

Sustainable now, sustainable together, sustainable now, sustainable forever
Sustainable now, sustainable together, sustainable now...

Sustainable development x 2
We've got to do our best to change the world.
Sustainable development x 2
It'll benefit me, it'll benefit you
Though I admit we've got a lot to do
Sustainable development
It's time to change the world

Sustainable now, sustainable together, sustainable now, sustainable forever, yeah!
